## The Maze

Equipment Needed:

- Poly Spots (25 per group) or Chalk Marks
- Maps (20+ different maps)
- One clipboard per group

## Directions:

1) Divide the class into small groups (groups of 6).
2) Each group is given a location to work from and one leader is chosen
3) Leader is only allowed to say "Yes" or "No," nothing else.
4) If a player steps on the wrong spot, they must leave the activity area and go to the end of their team line.
5) Players who are not on the activity area should be paying attention, instead of talking, to be successful.
6) Goal is for the leader to navigate the entire team from one side to the other (using the map)
7) If the whole team is able to cross, a new leader is chosen. Teams can pick up a new map from the teacher. (hopefully you will have everyone be the leader at least once)
8) Continue the activity until time is called by the teacher, report to the teacher how many Mazes you completed
